

Java

```
class Solution {  
    public String predictPartyVictory(String senate) {  
  
    }  
}
```

JavaScript

```
/**  
 * @param {string} senate  
 * @return {string}  
 */  
var predictPartyVictory = function(senate) {  
  
};
```

C++

```
class Solution {  
public:  
    string predictPartyVictory(string senate) {  
  
    }  
};
```

C#

```
public class Solution {  
    public string PredictPartyVictory(string senate) {  
  
    }  
}
```
